

## Class Activity-I/O Operations -CO5

CODE:

### 1. Read and Write using FileReader FileWriter Class

```
import java.io.FileReader;
import java.io.FileWriter;
import java.io.IOException;

public class Main {

    public static void main(String[] args) {

        try {

            FileWriter writer = new FileWriter("student.txt");

            writer.write("Student Name: Monesh\n");

            writer.write("Roll Number: 101\n");

            writer.write("Course: Computer Science\n");

            writer.write("Marks: 85\n");

            writer.close();

            System.out.println("Data written successfully.\n");

            FileReader reader = new FileReader("student.txt");

            int ch;

            System.out.println("Content of the file:");

            while ((ch = reader.read()) != -1) {

                System.out.print((char) ch);

            }

            reader.close();

        } catch (IOException e) {

            System.out.println("Error: " + e.getMessage());

        }

    }

}
```

OUTPUT:

A screenshot of a terminal window with a dark background. The window has a title bar at the top with a close button, a maximize button, and a settings icon. The text in the terminal is as follows:

```
Data written successfully.  
  
Content of the file:  
Student Name: Monesh  
Roll Number: 101  
Course: Computer Science  
Marks: 85
```
