

Class Activity-I/O Operations -CO5

CODE:

3. Copy the content from source to destination using BufferedReader and BufferedWriter

```
import java.io.BufferedReader;
import java.io.BufferedWriter;
import java.io.FileReader;
import java.io.FileWriter;
import java.io.IOException;

public class Main {
    public static void main(String[] args) {
        String sourceFile = "source.txt";
        String destinationFile = "destination.txt";
        try {
            BufferedWriter writer = new BufferedWriter(
                new FileWriter(sourceFile));
            writer.write("Hello, this is the source file.");
            writer.newLine();
            writer.write("This content will be copied.");
            writer.newLine();
            writer.write("Java File Handling Example.");
            writer.close();

            BufferedReader reader = new BufferedReader(
                new FileReader(sourceFile));

            BufferedWriter destination = new BufferedWriter(
                new FileWriter(destinationFile));

            String line;
            while ((line = reader.readLine()) != null) {
                destination.write(line);
                destination.newLine();
            }
        }
    }
}
```

```
        reader.close();

        destination.close();

        System.out.println("Content copied successfully.");

        System.out.println("Source File: " + sourceFile);

        System.out.println("Destination File: " + destinationFile);

    } catch (IOException e) {

        System.out.println("Error: " + e.getMessage());

    }

}
```

OUTPUT:

```
Main.java  destination.txt  source.txt
1 Hello, this is the source file.
2 This content will be copied.
3 Java File Handling Example.
4
Content copied successfully.
Source File: source.txt
Destination File: destination.txt
```
