

Class Activity-I/O Operations -CO5

CODE:

5. Delete a file , if exist

```
import java.io.File;
```

```
import java.io.IOException;
```

```
public class Main {
```

```
    public static void main(String[] args) {
```

```
        File file = new File("sample.txt");
```

```
        try {
```

```
            if (file.exists()) {
```

```
                if (file.delete()) {
```

```
                    System.out.println("Existing file deleted successfully.");
```

```
                } else {
```

```
                    System.out.println("Unable to delete the file.");
```

```
                    return;
```

```
                }
```

```
            } else {
```

```
                System.out.println("File does not exist.");
```

```
            }
```

```
            if (file.createNewFile()) {
```

```
                System.out.println("File created successfully again.");
```

```
            } else {
```

```
                System.out.println("File could not be created.");
```

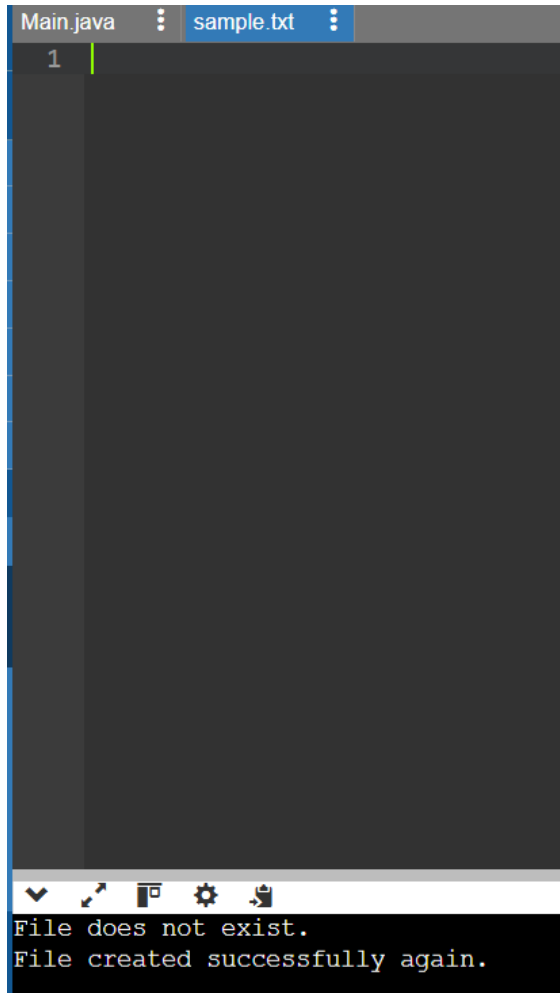

```
            }
```

```
        } catch (IOException e) {
```

```
            System.out.println("Error: " + e.getMessage());
```

```
}  
}  
}
```

OUTPUT:

The screenshot shows an IDE window with two tabs: 'Main.java' and 'sample.txt'. The 'sample.txt' tab is active. The editor area is mostly empty, with a line number '1' visible on the left. At the bottom, there is a toolbar with icons for a dropdown menu, a window icon, a settings gear, and a file icon. Below the toolbar, a black console area displays two lines of text: 'File does not exist.' and 'File created successfully again.'
